Takahashi EM 500: \$7500. Will ship worldwide buyer pays all shipping, insurance duties etc.

WOULD CONSIDER Trades: Details to be worked out!

140mm f7.5 StarFire EDF Triplet Apochromatic Refractor with 2.7" or 4" Focuser

130mm f6.3 StarFire EDF 'Gran Turismo' Triplet Apochromatic Refractor with 2.7" Focuser

The EM 500 is rated for 89-120 lbs excluding the weights. PE 3.5 arc/sec peak to peak. This EM 500 is closed loop. The new ones are not. Points dead on with 20 points in T-point. This is a \$13,000+ package for basically 1/2 the price. The original Takahashi box will be put in 3/4 in plywood box to assure safe shipping. Images are 10 minutes unguided and unprocessed. Reason for selling is that I am moving and will not have an observatory again for a couple of years.

Sale includes:

1) EM500 serial number 04005 NEAR MINT

2) Power supply. I have build a whole new case for the power supply with 3 grounded plug and LED ON/OFF switch. Note if the power supply dies they are only 15.00 and can be placed in the case with just a change of three wires.

3) Three 20 lbs weight are included.

4) Casady Saddle ( NOT the BT Technology saddle in the pictures).

5) Alan head driver 3/4 inch for mounting it to a tripod of pier plate.

6) Dongle to connect the Din pin on the Temma to a USB port.

7) Guide Port Converter for Tak mount to hook up you guide camera. Connectivity cables all set to go to your computer or USB Extender.

8) All original paper work and certificate. Original boxes.

9) Pegasus software unused.

NOTE 1: Casady saddle included instead of pictured BT saddle. The PWT FIA is not included in the price. If you want it \$495.00.

Payment: Bank transfer, certified bank check ( must clear before delivery). Paypal with a 4% fee. NO PERSONAL CHECKS.

Only the above listed is for sale. No scopes, cameras or piers. Any questions feel free to ask.

Thanks Craig
